mind racing [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

mind racing implications [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

mind racing possibilities [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

mind racing questions [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

mind racing tried [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

mind reeling [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

Mind-boggling figure [\[low\]](#) AI overuses hyperbolic quantifiers like 'mind-boggling' to dramatize numbers.

mixture fear [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

more often than not [\[low\]](#) AI-elevated frequency hedge.

morning sun [\[low\]](#) Top repetitive n-gram in claude-3.5-sonnet output (slop-forensics).

move beyond [\[low\]](#) Top repetitive n-gram in glm-4.6 output (slop-forensics).

moving forward [\[low\]](#) 'Moving forward' is a filler transition AI leans on for pivots.

multi faceted approach [\[low\]](#) Top repetitive n-gram in gemma-3-4b-it output (slop-forensics).

nail polish [\[low\]](#) Top repetitive n-gram in deepseek-r1 output (slop-forensics).

narrative perspective [\[low\]](#) Top repetitive n-gram in claude-3-haiku output (slop-forensics).

narrowed mind [\[low\]](#) Top repetitive n-gram in llama-3.2-1b-instruct output (slop-forensics).

narrowed mind racing [\[low\]](#) Top repetitive n-gram in llama-3.2-1b-instruct output (slop-forensics).

navigate complexities [\[low\]](#) Top repetitive n-gram in gpt-4o-mini output (slop-forensics).

navigate the complexities of [\[low\]](#) Stock AI collocation pairing the metaphor 'navigate' with the spike-word 'complexities.' Appears on over-used-

need-to-know / must-have / game-winning [\[low\]](#) Hyphenated urgency compounds AI stacks in headlines ('5 must-have tools', 'need-to-know tips'); the dense comp

Needlessly enough [\[low\]](#) Odd sentence-initial adverb phrases like this are a subtle AI awkwardness tell.

neon sign [\[low\]](#) Top repetitive n-gram in reka-flash-3:free output (slop-forensics).

Never fold / never break [\[low\]](#) Stock toughness assertion; AI states unbreakability as a mood with no pressure or test described, making the r

never leaving [\[low\]](#) Top repetitive n-gram in mistral-small-3.1-24b-instruct-2503 output (slop-forensics).

never leaving face [\[low\]](#) Top repetitive n-gram in mistral-small-3.1-24b-instruct-2503 output (slop-forensics).

never seen [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

never seen anything [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

new world [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

newfound sense purpose [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

next morning [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

next time [\[low\]](#) Top repetitive n-gram in claude-3.7-sonnet output (slop-forensics).

next week [\[low\]](#) Top repetitive n-gram in claude-3.5-sonnet output (slop-forensics).

nodded eyes [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

nodded mind racing [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

object class euclid [\[low\]](#) Top repetitive n-gram in claude-3.7-sonnet output (slop-forensics).

object class keter [\[low\]](#) Top repetitive n-gram in deepseek-r1 output (slop-forensics).

okay deep breaths [\[low\]](#) Top repetitive n-gram in gemini-2.0-flash-001 output (slop-forensics).

old man [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

old man hemlock [\[low\]](#) Top repetitive n-gram in gemma-3-27b-it output (slop-forensics).

old man tiber [\[low\]](#) Top repetitive n-gram in gemma-3-27b-it output (slop-forensics).

On the contrary [\[low\]](#) Formal AI-favored contrast connective.

On the flip side [\[low\]](#) AI-elevated contrast marker.

On the other hand [\[low\]](#) A both-sides connector AI pairs mechanically with 'on one hand' to perform balanced analysis; the rigid symmet

one day [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

one final [\[low\]](#) Top repetitive n-gram in claude-3.5-sonnet output (slop-forensics).

one final time [\[low\]](#) Top repetitive n-gram in claude-3.5-sonnet output (slop-forensics).

one hand [\[low\]](#) Top repetitive n-gram in chatgpt-4o-latest output (slop-forensics).

one key [\[low\]](#) Top repetitive n-gram in llama-4-scout output (slop-forensics).

one last [\[low\]](#) Top repetitive n-gram in claude-3.5-sonnet output (slop-forensics).

one last time [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

one one [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

one primary [\[low\]](#) Top repetitive n-gram in llama-4-scout output (slop-forensics).

One should remember [\[low\]](#) Impersonal reminder phrasing common in AI prose.

one size fits [\[low\]](#) Top repetitive n-gram in gemma-3-4b-it output (slop-forensics).

one thing [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

one thing certain [\[low\]](#) Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

One way to [\[low\]](#) Common AI how-to scaffolding phrase, weak on its own.

opened eyes [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

opened mouth [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

opened mouth protest [low] Top repetitive n-gram in claude-3-haiku output (slop-forensics).

Our team of experts [low] An authority claim with no names or credentials; the model invents an institutional 'we' to borrow trust it ca

oxford university press [low] Top repetitive n-gram in mistral-nemo output (slop-forensics).

pain point [low] AI marketing-jargon term for customer problems.

painting sky hues [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

Painting the sky / Colors of the sky [low] Decorative celestial imagery the model adds for prettiness; 'painting the sky' is a stock visual that signals

passage contains references [low] Top repetitive n-gram in claude-3.5-haiku-20241022 output (slop-forensics).

performance indicators kpis [low] Top repetitive n-gram in gpt-oss-20b output (slop-forensics).

phone buzzes text [low] Top repetitive n-gram in reka-flash-3:free output (slop-forensics).

piercing blue eyes [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

pinched bridge nose [low] Top repetitive n-gram in deepseek-chat-v3-0324 output (slop-forensics).

play critical role [low] Top repetitive n-gram in llama-4-scout output (slop-forensics).

play crucial role [low] Top repetitive n-gram in gpt-4o-mini output (slop-forensics).

play pivotal role [low] Top repetitive n-gram in gpt-4o-mini output (slop-forensics).

playing lips [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

plays crucial role [low] Top repetitive n-gram in gpt-4o-mini output (slop-forensics).

plays pivotal role [low] Top repetitive n-gram in gpt-4o-mini output (slop-forensics).

plays vital role [low] Top repetitive n-gram in gpt-4.1-nano output (slop-forensics).

polished obsidian [low] Top repetitive n-gram in Darkest-muse-v1 output (slop-forensics).

post world war [low] Top repetitive n-gram in grok-4-fast output (slop-forensics).

pounding chest [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

Pro tip: [low] AI listicle interjection.

problem solving [low] Top repetitive n-gram in gemini-2.5-flash-lite output (slop-forensics).

provides shelter and hiding spots [low] Vision-model tic of appending unprompted functional analysis to a pure image description; distinctive enough t

psychological evaluation [low] Top repetitive n-gram in claude-3.5-haiku-20241022 output (slop-forensics).

public health [low] Top repetitive n-gram in gpt-4o-mini output (slop-forensics).

Pull up in the (drop-top / foreign) [low] Default 'arrival' flex line; AI uses 'pull up' + generic car as a stock entrance image, repeated across output

pulse hammered throat [low] Top repetitive n-gram in deepseek-chat-v3-0324 output (slop-forensics).

pulse roared ears [low] Top repetitive n-gram in reka-flash-3:free output (slop-forensics).

Quite important [low] A vague intensifier phrase AI uses to assert significance weakly.

rain continued fall [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

Raise the bar [low] Overused motivational business idiom common in AI-generated marketing prose.

raised eyebrow [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

raised eyebrow skeptically [low] Top repetitive n-gram in gpt-4.5-preview output (slop-forensics).

raised hand [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

raised hand silencing [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

Rapid pace of development [low] Boilerplate AI framing about how fast a field moves.

reach eyes [low] Top repetitive n-gram in claude-3.5-haiku-20241022 output (slop-forensics).

reaching new heights [low] Generic aspirational idiom frequently produced by AI writing.

ready face [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

ready face whatever [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

real time [low] Top repetitive n-gram in gpt-4.1-nano output (slop-forensics).

real time data [low] Top repetitive n-gram in gpt-oss-20b output (slop-forensics).

real world [low] Top repetitive n-gram in qwen3-30b-a3b-instruct-2507 output (slop-forensics).

Really quite impressive [low] AI padding with stacked intensifiers around a weak evaluation.

recent years [low] Top repetitive n-gram in llama-4-scout output (slop-forensics).

red light [low] Top repetitive n-gram in deepseek-r1 output (slop-forensics).

Redefine excellence [low] Empty superlative pairing typical of AI-generated promotional copy.

Remarkable proficiency [low] Inflated praise phrasing common in AI prose.

Remarkable success [low] Generic superlative AI uses to describe outcomes.

Remarkably important [low] AI overqualifies importance with adverbial hype.

renewed sense purpose [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

replied voice [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

replied voice steady [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

researcher voss [low] Top repetitive n-gram in reka-flash-3:free output (slop-forensics).

resonated deep within [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

retrieved https [low] Top repetitive n-gram in mistral-nemo output (slop-forensics).

retrieved https www [low] Top repetitive n-gram in mistral-nemo output (slop-forensics).

right arm [low] Top repetitive n-gram in gemini-2.5-pro-exp-03-25 output (slop-forensics).

risk mitigation [low] Corporate-jargon pairing LLMs reach for in business prose.

road ahead would [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

rolled eyes [low] Top repetitive n-gram in deepseek-chat-v3-0324 output (slop-forensics).

room fell silent [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

root cause analysis [low] Business-jargon phrase frequently inserted by AI in process writing.

run spine [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

Said another way [low] AI restatement transition padding explanations.

said trying sound [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice barely [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice calm [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice dripping [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice echoing [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice filled [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice firm [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice laced [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice like [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice low [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice smooth [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

said voice soft [low] Cross-model repetitive collocation (slop-forensics; stopwords stripped — words may appear with function words)

RHYME_PAIR (170)

alive/survive [high] Survival-anthem rhyme ('I'm still alive / I will survive'); AI's reflex for defiant choruses, and 'I will surv

alone/unknown [high] Multi-syllable rhyme that lets AI gesture at melancholy and mystery at once ('walking all alone / into the gre

away/stay [high] Push-pull relationship rhyme ('don't walk away / I need you to stay'); the model's default for a pleading vers

baby/maybe [high] The single most predictable R&B rhyme; an LLM picks the highest-probability rhyme for the most common term of

back roads/moonshine [high] A specific co-occurrence the user flagged; AI welds these two as a stock 'authentic country' couplet even thou

believe/achieve [high] The quintessential motivational-poster rhyme (believe→achieve→succeed). AI gravitates to it in empowerment son

blue/you [high] Color-of-sadness mapped to the addressee — the single most common heartbreak rhyme in the training corpus ('I'

break/ache [high] AI's default heartbreak-pain rhyme; 'ache' is its top emotional perfect rhyme for 'break,' producing the omnip

chain/lane [high] 'Stay in my lane' is a stock motivational idiom and 'chain' a stock flex; the model welds idiom to flex through

chains/pain [high] AI's go-to rhyme to justify the 'chains' liberation trope; the chains exist largely to rhyme with pain, exposi

cry/die [high] AI's melodrama default; pairs the two most extreme emotional verbs because they're an easy perfect rhyme, sign

cry/sky [high] Default sorrow rhyme; the model reaches 'sky' to rhyme 'cry,' which is why so many AI sad songs gratuitously g

dance/romance [high] A 1970s-disco-grade cliché the model treats as live, pairing the two most obvious -ance words; flagged in song

dark/spark [high] Hope-in-the-dark trope rendered as a clean rhyme ('lost in the dark / one little spark'); AI pairs them to man

deep/sleep [high] A perfect one-syllable rhyme that AI reaches for to fill an emotional-depth line ('feelings buried deep / can'

dreams/seems [high] 'Chase my dreams' + 'nothing what it seems' — the -eem(s) family carries the model's ambition narrative. 'Chas

dreams/seems / chasing dreams [high] 'Chasing dreams' plus the dreams/seems rhyme is a hallmark of generic AI motivational lyrics — abstract aspira

eternity/destiny [high] AI clusters its prestige abstractions and rhymes them off each other ('our destiny / through eternity'). Two c

eyes/skies [high] Default visual cliché: AI maps 'eyes' to the only easy celestial rhyme, producing the universal 'eyes like the

feel/real [high] 'Keep it real' + 'how I feel' is the single most generic sincerity couplet; both words are pure abstraction. T

fight/light [high] AI's default coupling of the struggle ('fight') and hope ('light') tropes; the pairing recurs so often it betr

fire/desire [high] The fire/desire/higher/liar/inspire family is the model's default for passion across genres; in rap it produce

fire/higher [high] Couples the 'spit fire' brag with the 'rise higher' ascent arc, two of the model's most-reused motifs (rise/so

flame/name [high] Couples passion-metaphor ('flame') with the beloved's 'name' — AI's go-to for a yearning bridge ('whisper your

forever/never [high] AI traffics in absolutes; these two near-rhymed superlatives appear together constantly to signal eternal stak

forever/together [high] Three-syllable wedding-vow rhyme often completed by 'never'; AI's go-to for eternal-love choruses ('we'll be t

free/be [high] The laziest possible rhyme — two of the most common words in English — and AI's default empowerment-anthem clo

free/be/see/me [high] The '-ee' open-vowel cluster ('wanna be free / can't you see / here with me') is AI's easiest sing-along rhyme

game/name [high] The -ame family is the model's success vocabulary: 'in the game', 'rise to fame', 'make a name', 'bring the fl

glory/story [high] 'This is my story / rise to glory' is the model's default arc-summary couplet; both nouns are abstract triumph

grace / embrace [high] Both words are Suno-wiki-named clichés AND a default rhyme pair; the model reaches for 'grace/embrace' because

grind/mind [high] The grind theme cluster (grind/shine/time/mind) is an AI attractor; grind/mind pairs hustle-platitude with mot

grind/shine [high] Caps the grind-to-reward arc the model loves ('I grind so I can shine'); 'shine' is the LLM's default success

heart/apart [high] Cited alongside fire/desire as the archetypal exhausted rhyme. AI reaches for it because 'heart' is the most f

heart/part [high] The shortest, most generic member of the heart-family rhymes; flagged in pop-cliché lists for decades and now

heart/start [high] Twin of heart/apart for the 'new beginning' verse; AI reaches for it because 'start' is the easiest perfect rh

hold/cold [high] Touch-deprivation cliché ('no one to hold / the bed is cold'); AI maps the absence of an embrace to literal te

hustle/muscle [high] A perfect two-syllable rhyme that pairs the two flattest grind-rap nouns, so the model fuses 'I'm on my hustle

kiss/bliss [high] The default romantic-peak rhyme; 'bliss' is AI's top abstract-joy noun and exists in lyrics almost solely to r

love/above [high] A perfect-rhyme trap that forces unnatural celestial imagery ('sent from above') to justify it. AI takes the b

love/dove [high] A rhyme so notoriously hacky it's a punchline; AI still produces it because it's a perfect rhyme for the near-

money/honey [high] The most worn rap couplet in existence; an LLM reaches for it because it's the highest-probability rhyme for '

night/fight [high] The default metal/rock anthem rhyme; pairs the genre's two most generic nouns. Its appearance signals the AI r

night/light [high] The -ight family is the model's darkness-to-hope engine: 'through the night', 'see the light', 'win the fight'

night/light/sight/right/fight [high] The '-ight' family is the densest cheap-rhyme cluster in English; AI cycles through all five within a single s

pain/chain [high] Bridges the struggle-noun 'pain' to the flex-noun 'chain', letting the model pivot from hardship to wealth in

pain/gain [high] Direct lift of the gym proverb 'no pain no gain' into bars; the model treats 'pain' as the canonical struggle-

rain / pain [high] Weather-as-emotion is the model's go-to figurative move; pain/rain (plus 'sunshine after rain') is a sentiment

shadow/echo [high] Not a true rhyme but a paired-imagery tell; 'shadows' and 'echoes' are AI's two favorite atmosphere nouns (cal

sky / fly / high [high] The elevation rhyme cluster (sky/fly/high/why) that auto-assembles around 'soar' and 'rise'; its co-occurrence

sky/fly [high] The -y aspiration family (sky/fly/high/try/why) is a massive AI attractor shared with pop. 'Touch the sky', 'I

soul/control [high] Abstract-on-abstract rhyme with no concrete image; AI loves it because both words are emotionally weighty and

soul/whole [high] AI's single most predictable lyric rhyme: 'soul' resolves to 'whole' (made me whole / heart and soul). It's th

stay/way [high] Top '-ay' cluster pairing; 'find a way' plus 'please stay' are both AI filler phrases, so the rhyme writes its

streets/beats [high] Self-referential filler the model loves: 'from the streets' (authenticity claim) + 'on these beats' (meta rap-

strong/belong [high] Belonging-anthem default; AI rhymes resilience ('stay strong') with acceptance ('where I belong'); the backbon

survive/alive/thrive [high] The full survival cluster; AI stacks all three in resilience songs, a tell that it's chaining the densest moti

tears/fears [high] Stacks two abstract emotion nouns into a tidy perfect rhyme; appears in almost every AI vulnerability verse wi

tears/years [high] Pairs crying with the passage of time ('all these tears / wasted years'); cited in forums as narrowing imagery

time/rhyme [high] Self-referential filler where the lyric rhymes the word 'rhyme' to admit it needed a rhyme; AI uses it to pad

all/fall [medium] Community posts specifically cite the 'all/fall' loop as a repetition-heavy AI tell ('give it all / watch me f

alone/unknown/stone/home [medium] AI's isolation cluster ('all alone / the great unknown / heart of stone / find my way home'); stacks its favor

arms/harm [medium] AI's default 'safe in my arms / away from harm' protector rhyme; near-rhyme glue for a stock comfort sentiment

around/found [medium] Search-and-find love rhyme ('looked all around / then you I found'); the inverted syntax to land the rhyme ('t

baby/maybe/lately/crazy [medium] Named in songwriting-cliché lists (baby/lately); AI overuses 'baby' as a syllable-filler address term and slan

believe/leave [medium] AI's default 'I can't believe you'd leave' rhyme; pairs trust with abandonment, a tidy perfect rhyme deployed

block/glock [medium] A documented top collocata-rhyme in rap that the model reproduces as its default street-danger couplet; it pai

brain/insane [medium] Another -ain(e) family default; 'insane' is the model's catch-all intensifier for skill ('my flow is insane')

break/mistake [medium] Default regret rhyme for AI apology songs; multisyllabic and generic, fits any relationship without detail.

break/take [medium] Generic conflict rhyme ('heart you break / love I take'); AI pairs the two highest-frequency verbs that perfec

breathel/leave [medium] Slant rhyme for codependency lines ('can't breathe / when you leave'); AI equates a partner with oxygen as a s

cash/fast [medium] The -ast family welds wealth ('stack the cash') to speed/longevity ('live it fast', 'built to last'). 'Built t

chains/remains/veins/pains [medium] AI's default 'breaking chains / through my veins / what remains / numbing pains' cluster for intensity verses;

cold/gold [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

crazy/amazing [medium] AI's default 'you drive me crazy / you're so amazing' slant rhyme; two of its most overused emotion adjectives

crazy/baby [medium] Stock pop slant-rhyme leaning on the filler word 'baby'; AI uses it as an easy chorus couplet. The reliance on

crown/down [medium] 'Wear the crown / never back down' is a stock king-metaphor couplet; the model treats 'crown' as the default s

cry/high [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

cry/why [medium] Question-and-tears couplet ('all I do is cry / I don't know why'); AI pairs the rhetorical 'why' with crying t

day/away [medium] Generic '-ay' filler; AI cycles 'day/away/stay/way/play' within one song, a structural rhyme-cluster tell.

deep/keep [medium] Named in songwriting-cliché lists; AI's default 'love runs deep / forever keep' rhyme, two abstractions glued

die/high [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

die/sky [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

down/town/around/crown [medium] AI loops the '-own/-ound' cluster ('falling down / leaving town / spin around') for easy filler; the repetitiv

dream/scheme [medium] AI pairs ambition ('chase your dream') with a forced 'scheme' that rarely fits the positive tone; the awkward

dream/seem [medium] A vague, filler-laden rhyme ('not as easy as it seems') that AI deploys to pad verses without committing to im

dream/team [medium] Default hype/anthem rhyme; AI uses it for any 'us against the world' verse with no concrete imagery.

dreams/beams [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

dreams/seams [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

emotion/ocean [medium] Feelings-as-water cliché with a clean three-syllable rhyme; AI equates depth of emotion with an ocean so relia

essence/presence [medium] AI pairs two of its favorite content-free abstractions as a rhyme ('your essence / your presence'). Both are v

eyes/cries [medium] Combines the overused 'eyes' image noun with crying; a tight perfect rhyme AI grabs for any tearful verse.

eyes/disguise [medium] AI's go-to for any 'hidden truth' verse; 'disguise' is its top multisyllabic perfect rhyme for the omnipresent

flame/game [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

flow/glow [medium] The -ow family clusters meta-rap ('my flow') with growth-platitudes ('watch me grow', 'I glow'); 'glow up' and

forever/endeavor [medium] AI reaches for the unusually formal 'endeavor' to rhyme 'forever,' a register mismatch in a pop lyric that bet

free/me [medium] Default liberation rhyme; pairs the abstract 'free' with the self, no concrete cage or scene, pure AI uplift f

game/same/name/flame [medium] AI chains the '-ame' cluster ('play the game / feel the same / call my name / an eternal flame'); flagged in s

girl/world [medium] The model's go-to for 'you're my everything' choruses; one of the most overused rhymes in its output.

glow/flow/grow/know [medium] The long-'ow' cluster is an AI filler goldmine ('let it flow / start to grow / now you know'); cycling severa

gold/soul [medium] Near/slant rhyme AI treats as perfect, used to assert worth ('heart of gold / ancient soul'); the pairing lean

grace/place/face [medium] -ace cluster common in generated worship/ballad lyrics ('amazing grace / a better place / see your face'); cha

hand/understand [medium] Comfort rhyme ('take my hand / I understand'); flagged in forums as a worn couplet, AI deploys it for any reas

hand/understand/stand/land [medium] AI chains the '-and' cluster ('take my hand / you understand / together we stand'); 'understand' is its top mu

heart/spark [medium] Spark-and-heart is a top-probability emotion rhyme; its mechanical recurrence signals rhyme-dictionary complet

high/sky [medium] Companion to sky/fly — 'reaching so high / touching the sky' is AI's elevation cliché. Two near-identical vowe

hold/gold [medium] 'Worth more than gold' is a generated-lyric staple; AI grabs 'gold' as its default value metaphor to rhyme 'ho

hold/old [medium] Default 'grow old together' rhyme; AI's most-produced aging-love couplet, generic and detail-free.

hood/good [medium] 'From the hood / turned out good' is a stock redemption couplet; the model uses 'the hood' as a generic origin

kiss/miss [medium] AI's default longing rhyme ('your kiss / how I miss'); two ultra-common words, no image, endlessly recyclable

knees/please [medium] Begging-posture rhyme ('down on my knees / baby please'); cited in forums among modern R&B/pop clichés, AI use

love/above (or dove) [medium] Explicitly cited in AI-cliché writeups: 'love' paired with 'above' or 'dove.' One of the oldest forced rhymes

mind/find [medium] Inner-search rhyme ('searching my mind / peace I can't find'); AI's default for a contemplative bridge. Both w

neon/dream [medium] AI pairs the cliché image 'neon' with the equally generic 'dream' because both are high-frequency and slant-rh

night/alright [medium] AI's stock reassurance rhyme; 'through the night / be alright' arrives as a pre-formed comforting couplet with

night/light/fight/right [medium] The '-ight' family (night/light/fight/right/alright/tonight) is the workhorse of AI empowerment choruses; sour

pain/again [medium] Slant rhyme AI treats as clean, used for cyclical-suffering lines ('here comes the pain / again and again'); t

power/hour [medium] 'Feel the power' + 'finest hour' (plus 'ivory tower', 'money shower') — the -ower family inflates ordinary bra

pride/inside [medium] Hidden-feeling rhyme ('swallow my pride / what's deep inside'); AI's default for vulnerability verses. 'Deep i

real/deal [medium] 'The real deal' is a frozen idiom the model unpacks across two rhyme positions; like real/feel it asserts legi

rise/eyes [medium] Empowerment-meets-imagery rhyme ('watch me rise / open your eyes'); AI's reflex for a triumphant turn. The 'op

rise/skies [medium] Default phoenix/uplift rhyme ('I will rise / to the skies'); AI's go-to triumphant-chorus pairing, abstract an

river/forever [medium] One of AI's most predictable country rhymes, jamming an eternal-love abstraction ('forever') against the genre

Saturday night/holy light [medium] AI reaches for the sin-and-salvation rhyme to sound thematically 'country.' The forced 'holy light' to rhyme '

sea/me [medium] AI rhymes vast water with the self for scale ('deep as the sea / a part of me'); like sea/free and sea/be, 'me

seams/beams [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

shadows/tomorrow [medium] A forced slant rhyme the model favors because 'shadows' (a top mood word) needs a partner; 'tomorrow/sorrow' g

shame/blame/game [medium] A three-way -ame cluster AI strings together in accusatory verses ('not my shame / take the blame / play your

shine/divine/define [medium] AI's radiance cluster ('let it shine / love divine / you define'); 'divine' is a register-spiking filler rhyme

sky/fly / sky's the limit [medium] sky/fly/high powers the model's aspiration choruses, and 'the sky's the limit' is the matching idiom. Forums f

sky/high / fly/high [medium] Default 'aspiration' rhyme that pulls in flight/soaring imagery. AI uses it for any uplift moment, so it signa

sorrow/tomorrow [medium] Despair-meets-hope rhyme ('drowning in sorrow / brighter tomorrow'); AI's formula for a verse-to-chorus mood p

soul/goal [medium] The -ole family is the model's introspection engine: 'deep in my soul', 'reach my goal', 'take control', 'make

streets/heat [medium] Pairs the authenticity claim 'the streets' with 'heat' (the model's PG-safe slang for a gun or for being 'hot'

strong/long [medium] Default empowerment-anthem rhyme ('stay strong / all along'); AI's go-to for motivational verses, generic and

strong/wrong [medium] The -ong family fuels resilience-platitudes: 'stay strong', 'all along', 'prove them wrong', 'where I belong'.

stronger/longer [medium] The default rhyme that powers 'made me stronger' empowerment choruses (stronger/longer/no longer). Its inevita

sun/one [medium] Devotion rhyme equating the beloved with the sun and 'the one' ('you're my sun / you're the one'); AI's stock

throne/own [medium] Continues the king/throne attractor; 'sit on the throne' + 'do my own' fuses royalty-flex with independence-pl

time/climb [medium] Default 'journey/struggle' rhyme; AI maps progress onto 'climb' reflexively, often with the cliché 'mountain t

time/grind [medium] Slant pairing inside the grind cluster ('it's my time' + 'on my grind'); both are motivational-poster phrases.

time/mine [medium] Default possession/longing rhyme; the model selects 'mine' as the top rhyme for 'time,' yielding the recurrent

town/down [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

trap/cap [medium] The model bolts two pieces of dictionary-acquired slang together ('in the trap' + 'no cap') because both are h

truck/luck [medium] Country-specific lazy rhyme: AI keeps the mandatory 'truck' token in the rhyme slot and reaches for 'luck'/st

trust/dust [medium] 'Can't trust' + 'bite the dust' — the -ust family delivers the model's loyalty-and-betrayal theme in frozen id

war/more [medium] The -or(e) family pairs conflict ('ready for war') with ambition ('want more', 'open doors', 'settle the score

whiskey/misty [medium] A slant rhyme AI forces to keep 'whiskey' in the chorus, dragging in 'misty(-eyed)' emotion vocabulary. The pa

world/unfurled [medium] AI reaches for the archaic 'unfurled' to rhyme 'world,' a register spike in a pop lyric that exposes vocabular

years/fears [medium] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

you and me / eternity [medium] Commitment rhyme that overreaches scale ('eternity') for a simple sentiment; AI grabs it because 'eternity' is

you/true [medium] Among the highest-probability rhymes in English; Suno's default for devotion lines, signaling no editing.

be/me [low] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

be/see [low] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

believe/receive [low] Community-circulated 'lazy rhyme' canon (aggregated lore + elemental end-word bank: fire, light, rain, eyes, s

TEMPLATE (156)

'**___ of the night**' opener ^[high] 'In the dead of night' and its variants are instant Suno tells.

'**a [soft/wry/knowing] [smile/glance]**' ^[high] Warm adjective on a small physical action — AI fiction/roleplay fingerprint.

'**a breath [he/she] didn't know [they] were holding**' ^[high] Notorious Claude/AI fiction beat.

'**a smile plays across their lips**' ^[high] Stock AI-fiction facial beat.

'**a testament to X**' frame ^[high] The 'testament' formula generalized — catches inflected uses.

'**break the chains**' ^[high] Default freedom/liberation image.

'**breath hitched / heart hammered / pulse quickened**' ^[high] Stock AI physiological-reaction beats.

'**chasing the ___**' ^[high] 'Chasing ___' aspiration mad-lib; one of Suno's most repeated frames.

'**dancing in/with the ___**' ^[high] Archetypal generic Suno image ('dancing in the moonlight').

'**feel it in my soul/bones**' ^[high] Tell-don't-show emotion phrase.

'**fire in my soul/veins**' ^[high] Passion-as-fire-in-the-body cliché; fully generic.

'**heart(s) on fire**' ^[high] Dead-on-arrival passion image.

'**in today's fast-paced/digital world**' ^[high] The single most parodied AI essay opener.

'**isn't merely... it's...**' ^[high] Same elevation tic in negative form; classic LLM closing-paragraph move.

'**it's important/worth to note**' ^[high] Filler hedge that announces nothing; one of the strongest AI prose tells.

'**it's not about X, it's about Y**' ^[high] Pseudo-deep reframing template the model reaches for to manufacture insight.

'**let's dive/delve into**' ^[high] 'Dive/delve in' is a canonical ChatGPT transition.

'**light in the dark(ness)**' ^[high] Hope-in-darkness cliché.

'**lost in the ___**' ^[high] Default transcendence line with an interchangeable object.

'**navigate the complexities/landscape**' ^[high] 'Navigate' + abstract noun is a studied ChatGPT focal-word pattern.

'**navigating [grief/complexity]**' ^[high] 'Navigate' + abstraction — a studied ChatGPT focal pattern.

'**never let you go**' ^[high] Top-tier love-song filler.

'**no longer a luxury**' frame ^[high] 'X is no longer a luxury — it's a necessity' AI B2B formula.

'**not just X, but Y**' elevation ^[high] The signature AI inflation frame ('not just a tool, but a revolution'). Sets up a fake contrast to sound profo

'**quirks an eyebrow**' / '**tilts head**' ^[high] AI roleplay body-language defaults.

'**rise from the ashes**' ^[high] The canonical AI resilience trope (phoenix/ashes).

'**shiver(s) down [his/her] spine**' ^[high] The single most parodied AI-fiction sensation beat.

'**tears like rain**' ^[high] Tears/rain simile is maximally overused.

'**the architecture/geometry of [abstraction]**' ^[high] Pretentious 'the [science] of [feeling]' — a strong AI essay/poetry tell.

'**two hearts beat as one**' ^[high] Union cliché.

'**under the stars/moonlight**' ^[high] Default romantic set-dressing.

'**unlock the power/potential**' ^[high] Marketing-AI staple; 'unlock' + abstract-noun is mode-collapse hype.

'**what remains unspoken / what we carry**' ^[high] Abstract 'what we carry' gravitas filler.

'**with every ___**' ^[high] Verse Nurse flags 'with every ___' as a top Suno mad-lib opener; the blank is filler.

As someone who [credentials], I can confirm ^[high] AI fabricates lived-experience authority via a fill-in-the-blank credential claim.

bold-first bullets ^[high] Every list item begins with a bolded lead-in phrase followed by a colon; heavy Claude/ChatGPT markdown habit,

burning [bridges/desire/fire/passion] ^[high] Fire imagery cluster overrepresented in AI lyric training data as a default metaphor.

ChatGPT turn0search / turn0news citation token ^[high] Internal source IDs (turn0search1, turn0news5) that ChatGPT's browsing tool emits around citations. They are m

Claude: 'I want to be direct / let me be honest' ^[high] Claude's signature framing move.

Comment X to receive Y ^[high] Explicit transaction engagement-bait pattern heavily produced by AI social copy; distinctive templated CTA.

contentReference[oaicite] citation artifact ^[high] ChatGPT web-search leaves a 'contentReference[oaicite:N][index=N]' citation stub in its answer; if it survives

endless [night/road/way] ^[high] AI repeatedly pairs 'endless' with time/journey nouns as a default intensifier.

fading [light/away/memories/dreams] ^[high] Predictable AI phrase for loss/decline in generated lyrics.

From X to Y, [main statement] ^[high] The 'From X to Y' framing is a signature AI sentence template used to imply sweeping range.

Gemini: 'here's a breakdown / what you need to know' ^[high] Gemini's default list-dump opener.

guilt curdled in [noun] ^[high] DeepSeek R1 signature emotion-as-physical metaphor; 'curdled' as an emotional verb is distinctive and rare in

heart hammered against her ribs ^[high] Cardinal AI fiction tell; the 'heart hammered ribs' construction is massively overrepresented in model outputs

Imagine a world where X ^[high] Mad-lib hypothetical opener AI uses to hook readers with an imagined scenario.

In an era where X ^[high] Fill-in-the-blank era opener that reliably flags AI-generated intros.

In the ever-changing world of X ^[high] Templated 'ever-changing world of [domain]' opener characteristic of AI writing.

It is not just about X, it is also about Y ^[high] Formulaic AI antithesis construction contrasting two ideas for false depth.

It's not X, it's Y ^[high] Contrastive binary structure LLMs default to for perceived sophistication; distinctive multiword shape, not a

knowledge-cutoff self-reference ^[high] The model narrating its own training boundary ('as of my last knowledge update', 'my training data goes up to

little did (he[she]they) know ^[high] Formulaic AI foreshadowing device signaling low-effort plotting; a strong narrative tell.

negative parallelism 'not X, but Y' ^[high] AI's signature rhetorical frame — defines a thing by what it isn't to sound profound.

Nicht nur X, sondern auch Y ^[high] German 'not just X, but also Y' — LLM-favored negative-parallelism structure mirrored across languages.

no real-time / cannot browse disclaimer ^[high] Assistant hedge about lacking live data or web access. Never something a human writer says about their own art

No X. No Y. Just Z. ^[high] The staccato tripe 'No X. No Y. Just Z.' opener is a recognizable AI/LinkedIn hook pattern.

Not just X but Y ^[high] The 'not just X, but Y' escalation is a strong AI stylistic tell.

Perplexity: 'According to a [year] report by' ^[high] Perplexity's formulaic citation attribution.

Perplexity: 'based on the search results / available informa ^[high] Perplexity/RAG answer-opener.

self-posed question, instant answer ('The result? Devastatin ^[high] Asks a tiny rhetorical question and answers it in one punchy word for fake drama.

The [noun] has revolutionized the way we [verb] ^[high] Formulaic AI tech-hype sentence template.

The problem isn't X. It's Y ^[high] A signature AI reframe that dismisses one thing to spotlight another.

The question isn't X. The question is Y ^[high] A formulaic AI reframe that redirects the reader's attention.

The secret that [industry] doesn't want you to know: ^[high] A clickbait AI hook that manufactures conspiracy and exclusivity.

This [tool/approach] is a game changer for ^[high] Formulaic hype template AI leans on to introduce tools or methods.

This isn't a tactics problem. It's a positioning problem ^[high] Instance of the AI negation-reframe formula swapping X for Y.

This isn't a X. It's a Y ^[high] Signature AI negation-reframe template used for dramatic contrast.

triadic abstract list ('the grief, the silence, the forgetti ^[high] Three abstract nouns as 'the X, the Y, the Z' — a top AI-poetry tic.

triadic negation 'No X. No Y. Just Z.' ^[high] Punchy negative-parallelism the model loves for taglines.

truly novel / highly innovative / completely unique ^[high] Intensifier + hype-adjective stacking; distinctive gratuitous-embellishment pattern.

Understanding [topic] is essential for ^[high] Mad-lib sentence stem AI uses to open explanatory sections.

Whether X or Y, [main statement] ^[high] 'Whether X or Y' is a formulaic AI hedging opener that manufactures false balance.

Whether you're a X or Y ^[high] Mad-lib inclusive opener AI uses to address every reader at once.

X is not just A, but B ^[high] The 'not just A but B' escalation template is one of the strongest AI-writing tells.

you light up my [world/heart/night] ^[high] Near-verbatim training-data love-song formula appearing with identical structure across AI songs.

■■■■■■■■ X, ■■ Y ^[high] Russian negative-parallelism formula ('not just a tool, but a partner'); the direct RU analogue of the English

'(there is) a particular kind of' ^[medium] Essayistic throat-clearing opener.

'a mixture/mix of [x] and [y]' ^[medium] AI's default way to describe an expression/emotion.

'And honestly? X' beat ^[medium] Faux-candid pivot both Claude and 4o over-use in casual register.

'at the end of the day' ^[medium] Dead-metaphor summarizer.

'deep inside/within (my soul)' ^[medium] Interiority padding the model adds to inflate a line.

'drowning in ___' ^[medium] Overwrought emotion-as-water cliché.

'Enter: X' dramatic introduction ^[medium] AI product/character introduction beat.

'for a (long) moment' ^[medium] Temporal hedge that signals 'feel something here'.

'grow/bloom through the cracks/concrete' ^[medium] Resilience-through-adversity nature image.

'here's the thing/kicker' ^[medium] Faux-conversational pivot the model inserts for rhythm.

'hold me close/tight' ^[medium] Default intimacy request.

'imagine a [x] where [y]' ^[medium] Hypothetical-world opener.

'In a world where X' opener ^[medium] Trailer-voice opener.

'in a world where' [medium] Movie-trailer opener the model uses to set false stakes.

'in the quiet/silence/dark' as a place [medium] Absence-as-setting; AI loves naming negative space.

'isn't going anywhere' closer [medium] 'X isn't going anywhere' AI trend-conclusion.

'It's less about X and more about Y' [medium] AI insight-reframe scaffold.

'just [breathe/stay/be]' closer [medium] Minimalist closing line for cheap emotional weight.

'living rent-free in [my] head' [medium] Worn-out internet phrase.

'more than just' [medium] Lead-in to the elevation frame; high-frequency AI hype connective.

'not because X, but because Y' [medium] AI motive-reframe parallelism (antislop-documented family).

'set the night/world on fire' [medium] Generic party/passion hyperbole.

'sit with (this feeling/the discomfort)' [medium] Therapy-register AI phrase.

'something about (the way)' opener [medium] Hedged-mystery opener.

'somewhere between [x] and [y]' [medium] Liminal-positioning cliché.

'take it to the next level' [medium] Empty escalation cliché.

'The goal? / bottom line?' self-answer [medium] Tiny rhetorical question answered instantly — marketing-AI tic.

'the kind of [noun] that [verb]' [medium] Vague-specific framing that sounds insightful while committing to nothing.

'the only thing that mattered' [medium] AI emotional-absolutism beat.

'the way [x] [does something]' opener [medium] Reverent 'the way light falls / silence holds' opener — pure mood, no content.

'Think X, but for Y' analogy frame [medium] AI startup-pitch analogy formula.

'What makes X special isn't Y' [medium] AI differentiation scaffold.

'whether you're a... or a...' [medium] Fake-inclusive audience hedge; pads without committing.

'X. Full stop.' emphasis [medium] AI hard-stop emphasis beat.

[quote], he barked [medium] DeepSeek R1 overuses 'barked' as a dialogue tag far above human baseline rates.

ad-lib filler (na-na / oh-oh / yeah-yeah) [medium] Default vocable filler Suno drops in to pad a chorus.

broken [chains/heart/dreams/promises] [medium] AI favors 'broken' as damage descriptor, producing predictable freedom/loss metaphors.

By doing X, you can achieve Y [medium] Mad-lib cause-effect promise structure AI overuses in how-to prose.

Can we talk about [X] for a second? [medium] Formulaic social-post opener AI uses to feign conversational intimacy.

cosmic/elemental imagery cluster [medium] AI lyric models default disproportionately to grand cosmic/elemental scales drawn from training-data cliché; d

crested like a wave [medium] Purple-prose water/wave metaphor AI reaches for during intimacy or emotional peaks instead of concrete sensati

Follow for more X content [medium] Generic AI-written social-media call to action.

Forget X. Focus on Y [medium] Punchy dismiss-then-redirect pattern AI uses for engagement copy.

formulaic AI section headers [medium] Wikipedia documents these boilerplate section titles as an AI structural tell; the model resolves any topic in

From X to Y [medium] The 'from X to Y' range template is a signature AI listing device.

From zero to X in 48 hours [medium] Formulaic growth-hype headline pattern common in AI marketing copy.

game-changer / game-changing [medium] Inflated novelty claim.

Granted, [obvious counterpoint] [medium] Formulaic concession opener AI uses to stage a fake counterargument.

Happy [doing task]! [medium] Cheery AI sign-off template like 'Happy coding!' or 'Happy writing!'.

landscape of X [medium] AI default metaphor for domain/industry framing; templated and distinctive though humans occasionally use it.

Most people think it's X. It's actually Y [medium] 'Most people think X, it's actually Y' is a stock AI/social contrarian hook.

Not a prototype. Not a demo. Production-ready [medium] The 'Not X. Not Y. Z.' rhetorical triple is a formulaic AI hype opener.

not X, but Y [medium] AI's signature binary-contrast rhetorical structure; over-detected by anti-slop samplers as a hallmark of gene

not X, not Y, just Z [medium] Signature AI staccato-negation rhythm that manufactures a false beat before an emotional reveal; distinctive t

Now, I'm not saying X, but [medium] AI hedging construction that raises a point while disclaiming it.

present-participle opener ('Standing there, she...') [medium] '-ing ..., she' sentence opener used as a default cadence.

rhetorical hook opener [medium] Manufactured engagement opener; AI defaults to a rhetorical question to feign a hook.

set her skin ablaze [medium] Temperature/fire metaphor overused in AI intimacy writing to signal desire without describing actual sensation

silhouettes for shadows; embers for fire; whispers for echoe [medium] When told to avoid clichés, AI lyric generators swap in near-synonyms rather than genuinely original imagery;

single-word sentence for gravity ('...tired. Hollow.') [medium] A lone word as a full sentence for emphasis.

some argue X while others contend Y [medium] Claude constitutional training presents balanced perspectives without resolving the tension; recurring both-si

Stop thinking of it as X. Start thinking of it as Y [medium] The 'stop thinking / start thinking' reframe is a formulaic AI persuasion pattern.

summarizing present-participle tail [medium] Wikipedia's 'present participle endings' tell: the real clause is followed by a floating '-ing' summary that e

The 3 pillars of [medium] Formulaic 'N pillars of X' listicle framing AI overuses.

the air was thick with [medium] Generic atmospheric cliché; AI anthropomorphizes the air instead of grounding emotion in concrete detail.

The bottleneck isn't X. It's Y [medium] Formulaic LinkedIn-style contrarian reveal template.

The ultimate list of [X]: [medium] A listicle AI hook overselling comprehensiveness.

What This Means for X [medium] Formulaic AI section header that pivots to implications.

X is dead. Y is what's next [medium] Formulaic provocative reframing template common in AI-generated thought-leadership and marketing copy.

X is more than just Y [medium] Stock 'more than just' construction used to inflate a claim without adding substance, a hallmark of AI filler.

X is the new Y [medium] Overused reframing cliché frequently produced by AI to sound punchy.

X isn't the future. Y is [medium] Provocative dichotomy template typical of AI-generated hype and LinkedIn-style posts.

'Cue the X' [low] AI staged-reaction beat.

'from X to Y,' merism opener [low] Sweeping 'from A to B' range-claim that sounds comprehensive while saying little.

'the world of X' filler [low] 'in the world of X' scope-filler AI over-uses.

'X, if you will' [low] Coinage-hedge tic.

double question opener ('X? Y?') [low] AI stacked-rhetorical-question opener.

'gentle' as an intensifier on things that aren't gentle [low] AI softens everything with 'gentle' regardless of fit.

Ascending tricolon (X, Y, and ultimately Z) [low] Beyond plain rule-of-three, models favor an escalating tricolon climaxing on 'ultimately/even Z'; the engineer

avoidance of 'is/are' via 'serves as / marks / offers' [low] AI dodges simple copulas, inflating 'X is Y' into 'X serves as Y' / 'X marks a Y.' This systematic verb-puffin

Balanced isocolon (When X, Y; when A, B) [low] Two clauses of matched length and grammar, repeated. AI loves perfectly weighted seesaw sentences; the metrono

Curly/smart quotes and apostrophes [low] Model output renders typographic curly quotes by default; in plaintext contexts where humans type straight quo

dialect flattening (uniform register across quoted speakers) [low] AI gives every character/quote the same idiolect; humans vary.

No contractions (it is, do not, cannot) [low] Default model register avoids contractions, producing an oddly formal tone in casual contexts; consistent 'it

paragraph-length uniformity [low] AI paragraphs cluster at 3-4 sentences with low variance.

This raises an important question: ... [low] AI inserts a 'this raises the question' pivot to fabricate a turning point in the argument. The question is us

Title Case Headers On Every Section [low] Gemini auto-titles every block in Title Case ('Understanding The Basics') even for casual answers. The compuls

X is a double-edged sword [low] Stock metaphor AI reaches for to perform nuance ('on one hand... on the other'). The reflexive both-sides fram

X rather than Y [low] The 'rather than' preference frame is AI's softer cousin of 'not X but Y.' It signals balanced contrast that L
